In addition your data have to be documented in our clinic according to our Data Protection Rights. At each time point you have the right to contradict against storing and forwarding of your data. That should be done by a message to the Organizers.

The 2nd Uveitis Course is supported by
**Uveitis Course IUSG Accra, Ghana**  
**February 8th – 14th, 2020**

In February 2020, the International Uveitis Study Group (IUSG) will host the Second African Uveitis Course in Accra, Ghana.

This course is modeled on 13 years of experience facilitating a similar course in Venice, Italy. The program activities to advance knowledge about uveitis in the context of ophthalmology are endorsed by the IUSG and the ICO.

CME points will be available to course participants.

This second Uveitis Course in Africa provides a fabulous venue for ophthalmic providers from across the globe and within the continent.

While covering the whole field of uveitis on the first few days, special topics will be offered later in four small interactive groups: to learn how to evaluate uveitis patients, to rationally develop a differential diagnosis, to interpret imaging results, and to optimize your treatment strategy. The interactive program will allow in depth discussion on management of even complicated uveitis issues.

The course will be limited to 80 attendees.

The international faculty is composed of highly experienced uveitis specialists who are well known for their teaching skills.

We hope we can welcome you in Accra next February.
